Who got paid off? There has been a major betrayal of the interests of the American Public, a complete about face in the conduct of the person or persons entrusted with caring for the interests of the American public.

It will come out, it will take time, possibly a long time, but it will come out... Who benefits from it? Only those who took the payoff and Microsoft.

This and today's DMCA rulings demonstrate that "justice" is just a word anymore, no wonder the public has little confidence in the justice system.

We the people long for justice. Not lip service..
